

# **PRODUCT PROFILE** **LASER LUBE™**

There's only one way to ensure the suspension's original performance — ask for Hendrickson genuine parts by name.

## **LASER LUBE™ SPRING EYE BUSHINGS**

— are an integral part of the front suspension system. They need to be inspected regularly to ensure optimum vehicle ride quality and handling.

To ensure high end user satisfaction and peak system performance, Hendrickson supplies the same genuine components for service requirements as were installed in the original OEM specification spring — with the same design, construction, performance and durability.

## **LASER LUBE SPRING EYE BUSHINGS**

- Hendrickson developed the only front spring eye bushing good enough to earn the Hendrickson name.
- The LASER LUBE bushing solves three major problems of front spring eye bushings:
  - ◆ Lack of lubrication.
  - ◆ Contamination by dirt and moisture.
  - ◆ Distortion of the bushing's shape.
- Hundreds of diamond shape wells are filled with graphite lubricant and a grease groove distribution pattern that ensures uniform lubrication. The graphite lubricant delivers an extra margin of protection from seized bushings.
- Urethane seals at each end keep grease in and grit out to keep grime from entering the bushings. This extends bushing and pin life.
- Unlike standard steel-back bronze bushings, the LASER LUBE Bushing has a seamless outer tube that provides dimensional stability and keeps the bushing in shape to keep the seals performing. This solid tube also seals the bushing to prevent road grime and other contaminants from entering the bushing.

*For The Road Ahead™*
